## Lifting Electromagnet Model Series MW04 for Handling Single Piece of Steel Plate

### Applications:

The small diameter round electromagnet is suitable for lifting and transporting single piece of thin steel plate and long steel plate. It can be used as electromagnetic clamping device in the operating machinery, also can be used as electromagnetic hand to hold extremely small materials. Please pay attention to thickness, width, length and weight of steel plate when choosing model so that you can have the exact electromagnet and control equipment with the fittest model and specifications.

overall dimension sketch

### Main technical data

DC-36~110V, TD-60%

Model		MW04-17T	MW04-22T	MW04-32T	MW04-40T				
overall dimension	A	165	216	318	406				
	B	113	147	178	480				
	C	30	40	60	100/55
