SLKS series double end safe switch

SLKS series double end safe switch is a kind of protect equipment use for stop of urgent accident of belt conveyor, It was in stall to two side of conveyor with steel wire.

Double end safe switch both side motion and have independent character, Operator may drag steel wire at any position of belt conveyor when urgent according occur in any position of conveyor, it may control switch and cut off circuit so conveyor stop that ensure safe of men and equipment.

model	trigger quantity		trigger capacity	normal travel \ limit travel	control telt length	action strength	reduce way	weight
	normal open circuit	normal close						
SLKS - 100	1	1	≤380V voltage ≤2A current	12±2mm \30 ± 2mm	≤100m	120±20 N	hand-reduce	3kg
SLKZ - 100	1	1	≤380V voltage ≤4A current	12±2mm \30 ± 2mm	≤100m	130±20 N	auto-reduce
